

Capability Statement

Who We Are

Established in 2014, WIN Trio, LLC (WIN Trio) is a Small Business Administration (SBA) **8(a) Certified** organization with a successful record of delivering high-quality technical and professional services to several federal and commercial customers. Our SMEs provide horizontal depth across the public sector with verticals in Cyber Security, Cloud/DevSecOps, Emerging Tech & IT Modernization, and Admin & Program Management domains to enable our clients to build, secure, and digitize their environments through continuous innovation.

Corporate Information

Musharaf Rashid, President
mr@wintrio.com, 704.287.5645
Unique Entity ID: E9GWUWJTVME7
Cage Code: 7D8H8

BIC & SUM Contract Vehicles

GSA STARS III Contract #: 47QTCB21D0194
(IT, Emerging Tech, & OCONUS tracks)
GSA MAS Contract #: 47QTCA20D007S
(Cyber HACs, Cloud, PSS, and IT70)

Certifications

NAICS Codes

541511, 541512, 541513, 541614, 541519, 541611, 541618, 541690, 518210, 561110, 423430

Our Service Offerings

Cyber Security

- Cyber Security Policy, Planning and FISMA Compliance
- Continuous Diagnostics & Mitigation (CDM)
- Cyber Security Assessment Management (CSAM) Implementation
- Incident Response, Pen Testing, and Vulnerability Management
- Cloud, Network, and App Security

Cloud/DevSecOps

- Cloud, Network, App, and Data Optimization
- Cloud Governance and Migrations
- Automation and Security Integration into CI/CD Pipelines
- Continuous, Intelligent, and Proactive Monitoring

AI, Emerging Tech & IT Modernization

- Enterprise Architecture and Roadmaps
- AI / Predictive Analytics, Data Strategy, Business Intelligence & Visualization
- Cloud and Data Center Consolidation
- Assessments and Agile Transformation

Admin & Program Management

- Scope, Sched, & Cost KPIs' dashboards
- EVM, Integrated Sched, Risk, & Controls
- Continuous Process Improvement (CPI)
- Admin Support and Stakeholder Mgmt

Corporate Experience

Cloud and Application Services US Department of Agriculture (USDA/NASS/OIG)

Focus Areas: Legacy Sys. Modernization, AI/Predictive Analytics & Visualization, Secure & Agile Software Dev, Security & Compliance

- **Exceptional CPARS and recipient of the Circle Award from the Agency Administrator, recognized as the top-performing vendor**
- Designed and delivered a cloud platform that reduced delivery timelines by 65% through a shared services model, API-driven architecture, and standardized frameworks.
- Improved ROI by 45% through refactoring legacy apps into cloud-native microservices and cloud optimization. Successfully delivered four production ready mission critical apps within a year.
- Achieved 50% cost savings for the Agency by infusing innovation and process automation. Additionally, governance and compliance maturity levels improved by 38 percent because of these efforts.

Support for Platform Engineering and DevOps Integration (SPEDI) Department of Homeland Security (DHS), US Citizenship and Immigration Services (USCIS)

Focus Areas: Cyber, Cloud (AWS, Azure, GCP), DevSecOps, AI/Pred. Analytics, Legacy Sys. Modernization, Infrastructure Optimization

- Key Cyber services (Zero Trust Architecture, Identity & Access Management, Vulnerability & Incident Management, and Device Engineering) for 65+ complex and heterogeneous systems.
- Performed scans for 80k assets monthly and improved organizational security posture by 40%.
- Reduced defects & security incidents by 60% thru standardized processes, cloud-first architecture, AI-ready solutions, & workflow automation.
- Established fully automated approach to system deployments, cloud provisioning, security hardening, enterprise CI/CD pipelines, resulting in significant cost savings, increased systems availability, and improved productivity.

IT Modernization, Analytics, and Cloud Migration Walmart Innovations Lab

Focus Areas: Supply Chain, Project Management, Cloud, DevSecOps, Mobile Computing, AI/ML, Data Management, OCONUS

- Partnered with Walmart in helping them modernize and transform their global supply chain through process optimization and technology consolidation, resulting in 30% O&M cost savings.
- Successfully migrated Walmart's critical analytics workloads to Cloud, resulting in 50% faster analytics deployment, 15% reduction in O&M costs, and 20% improvement in inventory forecasting accuracy.
- Designed Remote Age Prevention app resulting in 60% reduction in manual product tagging via NLP-driven automation, while incorporating real-time dashboards integrated with cloud data pipelines, and meeting 100% SLAs for global round-the-clock teams.

Healthcare Systems Modernization Strategy Federal Employee Program Operations Center (FEPOC)

Focus Areas: Healthcare Systems Transformation, Mainframes to Cloud Modernization, AI/Data Analytics, Business Strategy

- Leveraged deep healthcare expertise to migrate legacy/mainframe apps to cloud resulting in streamlined processes and reduced costs.
- Created baseline assessment of current legacy/mainframe systems and devised Cloud Adoption Framework (CAF) to migrate apps to cloud.
- **Supported 30+ mission critical apps** encompassing health care claims, benefits, eligibility, enrollment, plans and carriers mgmt, Personally Identifiable Information (PII), Protected Health Information (PHI), clinical data, and financial data.

"WINtrio has consistently delivered high-quality services and has exceeded expectations across all assigned efforts. Through API-driven architecture, standardized frameworks, and expanded use of shared services, the Agency realized approximately 50% cost savings. Governance and compliance maturity improved by 38% because of these efforts." - Director, Strategic Planning and Business Services Division, USDA
